

Angling

Enjoy

The protected waters of The Wash and North Norfolk coast are home to a rich and diverse marine life, including a wide variety of commercial and recreational fish species.

Respect

- Please use designated car parks, to avoid blocking access points
- Consider the safety of those around you, by allowing plenty of room when casting (at least 20 metres)

Protect

- Keep to footpaths, pathways or tracks when travelling to your mark, to avoid damaging sensitive habitats
- Choose a biodegradable fishing line, to reduce the environmental impact of any accidental loss
- Use fishing line of appropriate breaking strain, to avoid losing tackle
- Consider using a single hook with a small barb (instead of a treble hook); this makes it much easier to release fish and causes minimal damage.
